Annual Index

Volume 67
1990

Subject

A

1,4-EPOXY ACIDS,
CPBA oxidation of selenium-containing, organoselenium-mediated cyclization of hydroxyolefinic fatty acids, 932
2-(N-ALKYL-N,N-DIMETHYLAMMONIO)ETHYL HYDROGEN,
phosphates, syntheses, physicochemical properties, 149
4-DESMETHYLSTEROLS,
illipe, butters, sal, 388
4-METHYLSTEROLS,
illipe, butters, sal, 388
7-KETOCHOLESTEROL,
gamma-irradiation, aqueous dispersions and liposomes, 923
^{13}C NUCLEAR MAGNETIC RESONANCE,
quantitative high resolution, vegetable oils, 484
ACACIA ARABICA,
seed oil, chemical, studies, nutritional, 433
ACYLATED,
rapeseed, proteins, functional, nutritional, properties, 531
ACYLGLYCEROL SYNTHESIS,
membrane bioreactor, 347
ADSORPTION,
soy oil free fatty acids, rice hull ash, 15
ADSORPTION BEHAVIOR,
dialkyl dimethyl ammonium chloride, nonionic surfactant binary systems, 64
AFLATOXIN PRODUCTION,
inhibition, cotton, bolls after treatment, with neem (*azadirachta indica*) leaf extracts, 215
ALCOHOL ETHOXYLATES AND ETHER SULFATES,
effect of, ethylene oxide distribution, on the, performance, 599
ALKYL AMINES,
effect of chain length, on the rate of, quaternization of, 469
ALKYL-GLYCIDYL ESTERS,
dicarboxylic acids, synthesis, 661
ALKYLETHOXYETHANESULPHONATES,
surfactants, synthetic conversions, 730
ALKYLPHENOL ETHOXYLATES,
trace analysis, HPLC, 400
α-LINOLENIC ACID,
edible oil, development, 364
AMPHIPATHIC COMPOUNDS,
preparation, surface active properties, 459
AMPHOTERIC SURFACTANTS,
phosphoric acid group, binary system of amphoteric/anionic surfactant, 455
containing a phosphoric acid, syntheses, physicochemical properties, 451
AMPHOTERICS,
surfactants, syntheses, 394
ANALYSIS,
vegetable oil volatiles, multiple headspace, extraction, 800
soybean oil, from Ohio, 594
tocopherols, phytosterols, vegetable oils, HPLC, evaporative light-scattering detection, 827
ANALYSIS OF SINGLE SOYBEAN SEEDS,
oil, protein, 686
ANIONIC,
surfactant, sulfonated, isoricinoleic acid, 205
surfactants, cloud point phenomena, 717
ANTIFOAMER,
rice bran oil, utilization, 61
ANTIOXIDANT EFFECT,
naturally occurring furan fatty acids, oxidation of linoleic acid in aqueous dispersion, 858
AQUEOUS DISPERSIONS AND LIPOSOMES,
7-ketocholesterol, gamma-irradiation, 923
AQUEOUS VESICLE DISPERSION,
poly(oxyethylene)hydrogenated castor oil, 55
ARACHIDONIC ACIDS,
production potential, red alga, *porphyridium cruentum*, 916
AUTOXIDATION,
palm oil, effects of, flavonoids, 255
AVENA SATIVA,
caryopses, natural lipase bioreactor, 761

B

BEEF TALLOW,
monoglyceride, solid phase, enzymatic glycerolysis, 779
BILE SALTS AND NONIONIC SURFACTANTS,
properties of aqueous solutions, two binary, mixed systems between, 1002
BIOLOGICAL REFINING,
crude oil, deacidification, *Pseudomonas*, selective removal of free fatty acids in oils using a microorganism, 558
BLEACHING CLAY,
spent, pyrophorisity, 678
BUTTER,
essential oils, natural preservatives, 188
BUTTER OIL,
thermal fractionation, critical evaluation, 981

C

C-13 NMR,
sodium monoglyceride sulfacts (MGS), 9
CALOPHYLLUM INOPHYLLUM KERNEL,
lipid composition, 955
CANOLA OIL HYDROGENATIONS,
recent advances, 39
CANOLA/RAPESEED PROTEIN,
functional properties, processing, effects of, 281
CANOLA SEED,
processing, thermal decomposition, indole, glucosinoates, 73
CANOLA SHORTENING,
liquid, efficacy, tertiary butylhydroquinone, storage, heat, 585
CARBONYL VALUES,
effects of filtration through bleaching media, of autoxidized, soybean oil, 373
CARBOXYLIC ACIDS,
hydrogenation of, rhenium-osmium, bimetallic catalyst, 21
CARNOSINE,
lipid oxidation, inhibition, 650
CASTOR OIL,
sebacic acid, 2-octanol, 333
CATALYSTS,
canola oil hydrogenations, 39
nitrile reduction, 48

CATIONIC,
surfactants, cloud point phenomena, 717
CATIONIC SURFACTANT,
property modifications, finished textiles, 689
CETANE NUMBERS,
n-alcohols, methyl esters, 565
CHARACTERISTICS,
low-linolenic rapeseed oil, 161
CHEMICAL EVALUATION,
defatted, *Vernonia galamensis* meal, 92
CHEMOMETRIC STRATEGY,
classification, lecithins, process performance, 537
CHOLESTEROL OXIDATION,
heated lard, enriched with two levels of cholesterol, 927
CIS AND *TRANS*-OCTADECENOIC ACIDS,
determination of, margarines, gas liquid chromatography-infrared, 804
CITRUS,
seed, oils, pigments, 376
COCOA BUTTER EQUIVALENTS,
interesterification, triglyceride, 519
COCOA BUTTER-LIKE FAT,
interesterification, vegetable oils, 832
COLOR QUALITY,
soybean oil, effect of soybean pretreatment, 368
COMPETITIVE ADSORPTION,
lutein, soy oil, 572
CONDUCTOMETRIC STUDIES,
praseodymium, neodymium, linoleates, 464
COTTONSEED OIL,
hydrogenation, kinetics of, nickel catalysts, 233
COWPEA FLOURS,
functional characteristics, 272
CRAMBE SEED,
ground, oil content, near-infrared reflectance measurement, moisture, protein, 435
CRITICAL EVALUATION,
thermal fractionation, butter oil, 981
CRITICAL TEMPERATURES,
calculation of, from the number of carbons in organic molecules, 101
CRUDE,
soybean oil, oxidative stability of, 165
CRUDE VEGETABLE OILS,
membrane processing, pilot plant scale, removal of solvent from oil miscellas, 315
CUCURBIT,
seed, oils, pigments, 376
CUPHEA SPECIES,
seed weight, variation in fatty acid content, 611

D

DEAMIDATION STUDIES,
food proteins, 675
DEGUMMING,
ultrasonic, crude, soybean oil, 33
DEODORIZATIONS,
fish oils, low temperature, volatile, acidic, steam, basic, 79
DETERGENT,
activity of protease enzymes, effect of builders, 711
DETERGENT BUILDERS,
influence, surface properties, 698
DETERMINATION,
neutral oil, detergent products by, solid phase extraction, 142
of relative, ethoxylation rate constants, supercritical fluid chromatographic analysis, ethoxylated alcohols, 123
country of origin, pistachio nuts, DSC and HPLC, 947
cis and *trans*-octadecenoic acids, gas liquid chromatography-infrared, 804
free, total, gossypol, high performance liquid chromatography, 182
DEUTERATION,
unsaturated triglycerides, rhodium-catalyzed, 52
DIALKYL DIMETHYL AMMONIUM CHLORIDE,
adsorption behavior, 64
DICARBOXYLIC ACIDS,
synthesis, alkyl-glycidyl esters, 661
DOCOSAHEXAENOIC ACIDS,
lipase, catalyzed, esterification, 561
DSC,
thermal analysis, palm stearine, 67:171
DSC AND HPLC,
determination of, country of origin, pistachio nuts, 947
DYNAMIC POLYMORPHIC PHASE TRANSITIONS,
model binary triglyceride system, measured by position-sensitive x-ray diffraction, 811

E

EDIBLE OIL,
metals, removal, membrane extraction, 28
EDIBLE OIL INDUSTRY,
membrane applications, 239
EFFECT OF MOISTURE, MICROWAVE HEATING, AND LIVE STEAM TREATMENT,
phospholipid D activity in, soybeans, soy flakes, 867
EICOSAPENTAENOIC,
production potential, red alga, *porphyridium cruentum*, 916
EICOSAPENTAENOIC ACID,
production of, mackerel, intestines, bacterium, 911
ELECTRON SPIN RESONANCE SPECTRA,
tocotrienoxyl radicals, palm oil, 250
ENZYMATIC
synthesis, n-5-ε-acyllysines, 771
ENZYMATIC FRACTIONATION,
fatty acids, catalyzed, esterification, 561
EPOXY ACID,
Vernonia galamensis, rich source, 844
ERUCIC ACID,
derivatives, preparation, characterization, 733
ESSENTIAL OILS,
natural preservatives, butter, 188
ETHOXYLATED ALCOHOL,
surfactants, wastewater, HPLC determination, 103
ETHOXYLATED ALCOHOLS,
supercritical fluid chromatographic analysis, 123
ETHOXYLATED PRODUCTS,
surfactants, molecular mass, distribution, 209
ETHOXYLATION RATE CONSTANTS,
effect of process variables, degree of ethoxylation, alcohol structure on relative, 541
determination, supercritical fluid chromatographic analysis, ethoxylated alcohols, 123
ETHYLENE OXIDE DISTRIBUTION,
effect of, performance, alcohol ethoxylates and ether sulfates, 599
EVAPORATIVE LIGHT-SCATTERING DETECTION,
phytosterols, tocopherols, vegetable oils, HPLC, 827
EXPORT,
soybeans, quality, 743
EXTRACTION,
Vernonia galamensis, seed oil, 512
EXTRACTION AND FUNCTIONALITY,
lentil, protein, peas, 276
EXTRACTION SOLVENTS,
effect, oxidative stability of, crude, soybean oil, 165

F

FAT CRYSTALS,
size distribution, measurement, using, laser particle counter, 329
FATS AND OILS,
modification, immobilized lipase reactors, a review, 890
FATTY MONOGYLCERIDE SULFATES,

C-13 NMR, 8,9
synthesis, 8
FATTY ALCOHOLS,
olive oils, 626
FATTY ACIDS,
solvent extraction, natural oils, liquid water, at elevated temperatures and pressures, 852
FATTY ACID COMPOSITION,
highbush blueberries, varietal difference, 499
FATTY ACID MUTATIONS,
ethyl methanesulphonate induced, flax, 213
FATTY ACID VARIATION,
U.S. runner-type, peanut cultivars, 591
FISH OILS,
low temperature, deodorizations, volatile, acidic, steam, basic, 79
FLAVONOIDS,
effects of, palm oil, 255
FLAX,
hull, compositional analysis, 79
edible oil, α-linolenic acid, development, 364
ethyl methanesulphonate induced, fatty acid mutations, 213
FOOD PROTEINS,
deamidation studies, 675
FORMATION,
sultones in, olefin sulphonation, 1020
FOURIER TRANSFORM RAMAN SPECTROSCOPY,
determination of, total unsaturation, oils, margarines, 483
FREE FATTY ACIDS,
potato slices, liberation of, at low temperature, 784
FUNCTIONAL PROPERTIES,
canola/rapeseed protein, effects of, processing, 281

G

GAMMA-IRRADIATION,
7-ketocholesterol, aqueous dispersion and liposomes, 923
γ-LINOLENIC ACID,
lipase, catalyzed, esterification, 561
increase in, solvent winterization, fungal oil, from *Mortierella genus*, 846
GAS CHROMATOGRAPHY,
inverse, soybean oil, thermodynamic study, 424
GLC DETERMINATION,
monoglycerides, propylene glycol esters, a new, internal standard, 797
GLUCOSINOLATES,
thermal decomposition, processing, canola seed, 73
GLYCERIDE SYNTHESES,
polyunsaturated, microbial lipases, 921
GLYCEROL ACYLATING ENZYMES,
turnip rape, safflower, 217
GOSSYPOL,
determination, free, total, high performance liquid chromatography, 182

H

HEATED LARD,
cholesterol oxidation, enriched with two levels of cholesterol, 927
HIGH PERFORMANCE LIQUID CHROMATOGRAPHY,
determination, free, total, gossypol, 182
HIGHBUSH BLUEBERRIES,
varietal difference, lipid content, fatty acid composition, 499
HPLC,
alkylphenol ethoxylates, 400
HPLC ANALYSIS,
phospholipids, in crude oil, evaluation of, soybean deterioration, 757
HPLC DETERMINATION,
ethoxylated alcohol, surfactants, wastewater, 103
HYDROGENATION,
polyenoic fatty acid methyl esters, selectivities and yields, 226
cottonseed oil, kinetics of, nickel catalysts, 233
carboxylic acids, rhenium-osmium, bimetallic catalyst, 21
palm stearine, chemical, composition, thermal properties, 176
HYDROXAMIC ACIDS,
lipase, *Mucor miehei*, 646
HYDROXY ACIDS,
Lesquerella fendleri, seed oils, preparative chromatographic, isolation, 495
HYDROXY ACIDS,
l. gordonii, seed oils, preparative chromatographic, isolation, 495

I

ILLIPE,
butters, triterpene alcohols, 388
IMIDAZOLINE,
hydrolysis, alkaline and acidic media, a review, 993
IMMOBILIZED LIPASE REACTORS,
modification, fats and oils, a review, 890
α OLEFIN SULFONATE,
stability, kathon CG/ICP microbicide, based systems, 116
INCREASE IN,
γ-linolenic acid, solvent winterization, fungal oil, from *Mortierella* genus, 846
INTERESTERIFICATION,
vegetable oils, cocoa butter-like fat, 832
triglyceride, lipases, 519
INVERSE,
gas chromatography, soybean oil, solvent systems, thermodynamic study, 424
INVESTIGATION,
technological properties, *Nigella sativa* (black cumin), seed oil, 958
ISOLATED SOY PROTEINS,
effects of maturation and storage, on solubility, emulsion stability and gelation properties, 974
ISOLATION AND CHARACTERIZATION,
polymers, heated, olestra, olestra/triglyceride blend, 788

J

JOJOBA OIL,
lubricant formulations, 1
surface activity, quaternary ammonium salts, 605

K

KATHON CP/ICP MICROBICIDE,
stability, in α olefin sulfonate, based systems, 116
KINETICS,
nucleation, palm oil melt, 879

L

L. GORDONII,
seed oils, hydroxy acids, isolation, 495
LECITHINS,
classification, chemometric strategy, process performance, 537
LENTIL,
protein, extraction and functionality, 276
LESQUERELLA FENDLERI,
seed oils, hydroxy acids, isolation, 495
LESQUERELLA FENDLERI SEED,
oil, meal, 438
LESQUERELLA FENDLERI SEED OIL,
minor components, 863
LINEAR ALKANES,
surfactant property, with, two pyrrolidone, moieties, 739
LINEAR ALKYLBENZENE SULFONATES,

influence of structure, counterions, physicochemical properties, 547
LINSEED MEAL,
flax, hull, compositional analysis, 79
LIPASE,
Mucor miehei, synthesis of fatty, hydroxamic acids, 646
palm oil fruit, histological localization, 665
catalyzed, fatty acid enrichment, 561
LIPASE CATALYZED ALCOHOLYSIS,
sunflower oil, 168
LIPASE IMMOBILIZATION,
polymeric membranes, 887
LIPASES,
interesterification, triglyceride, 519
LIPASES IN REVERSE MICELLES,
colorimetric determination, fatty acids, assay of, 110
LIPID CONTENT,
highbush blueberries, varietal difference, 499
LIPID OXIDATION,
carnosine, inhibition, 650
LIPID COMPOSITION,
calophyllum inophyllum kernel, 955
LIPID PRODUCTS,
hydrolyzed with lipase and phospholipase A-2, surface activity of, 1008
LIQUID CRYSTALLINE PHASE,
formation, between, aqueous, surfactant solutions, oily substances, 154
LONG CHAIN TRIOL ACIDS,
reaction, hydrogen bromide, 597
LOW-LINOLENIC RAPESEED OIL,
characteristics, room-odor tests, 161
LOW-LINOLENIC RAPESEED OIL,
characteristics, 161
LUBRICANT FORMULATIONS,
jojoba oil, 1
LUTEIN,
competitive adsorption, soy oil, rice hull ash, 572

M

MARGARINES,
stick, North american, textural, physical properties, 323
determination of, total unsaturation, Fourier transform raman spectroscopy, 483
MATURATION AND STORAGE,
solubility, emulsion stability and gelation properties, of isolated soy proteins, 974
MEADOWFOAM OIL,
triacylglycerols, structure of, 503
vulcanized, 670
MECHANISM,
hydrazine reduction reaction, appications to selected monoethylenic, diethylenic and triethylenic fatty acids of *cis* configurations, 940
MELON,
seeds, solvent extraction, 25
seed oils, extraction of, temperature effects, 443
MEMBRANE APPLICATIONS,
edible oil industry, 239
MEMBRANE BIOREACTOR,
acylglycerol synthesis, 347
MEMBRANE EXTRACTION,
metals, removal, edible oil, 28
MEMBRANE PROCESSING,
crude vegetable oils, pilot plant scale, removal of solvent from oil miscellas, 315
MEMBRANE EXTRACTION,
metals, removal, edible oil, 28
METALS,
removal, edible oil, membrane extraction, 28
METHYL ESTERS,
cetane numbers, 565
MICELLAR BEHAVIOR,
samarium soaps, influence of alkanols, 446
MICROBIAL LIPASES,
polyunsaturated, glyceride syntheses, 921
MINOR COMPONENTS,
Lesquerella fendleri seed oil, 863
MODEL BINARY TRIGLYCERIDE SYSTEM,
dynamic polymorphic phase transitions, measured by position-sensitive x-ray diffraction, 811
MOLECULAR WEIGHT DISTRIBUTION,
effects, nonionic surfactants, oil/water emulsions, stability, 145
MONOACID TRIGLYCERIDES,
influence of *cis* and *trans* double bonds, thermal, stuctural properties, 653
MONOGLYCERIDE,
solid phase, enzymatic glycerolysis, beef tallow, 779
MONOGLYCERIDES,
GLC determination, a new, internal standard, 797
MONOISOMERIC DI- AND TRIALKYLBENZENES,
sulfonation studies, 132
MORTIERELLA RAMANNIANA VAR. *ANGULISPORA*,
fungal oil, supercritical fluid extraction, 553
MUCOR MIEHEI,
lipase, synthesis of fatty, hydroxamic acids, 646
MULTIPLE HEADSPACE,
analysis of, vegetable oil volatiles, extraction, 800
MUTTON TALLOW,
Uruguayan, characteristics of, 980

N

N-ε-ACYLLYSINES,
enzymatic, synthesis, 771
N-ALCOHOLS,
cetane numbers, 565
N-BUTYL OLEATE,
synthesis of, by immobilized *Mucor miehei* lipase, influence of water, 775
NATURAL LIPASE BIOREACTOR,
avena sativa, caryopses, oat, 761
NATURAL PRESERVATIVES,
butter, 188
NEAR-INFRARED REFLECTANCE MEASUREMENT,
moisture, protein, oil content, ground, 435
NEUTRAL OIL,
detergent products by, determination, solid phase extraction, 142
NEUTRON SCATTERING,
small angle, crystalline, 76
NIGELLA SATIVA (BLACK CUMIN),
seed oil, investigation of, technological properties, 958
NIR,
determination of, oil content of seeds, influence of fatty acid composition, on wavelength selection, 473
NITRILE REDUCTION,
catalysts, evaluation, 48
NONIONIC SURFACTANTS,
molecular weight distribution, effects, oil/water emulsions, stability, 145
NONIONIC SURFACTANT BINARY SYSTEMS,
adsorption behavior, 64
NUCLEATION,
kinetics, palm oil melt, 879
NUTRITIONAL,
toxicological, evaluation, rubber seed oil, 883

O

OAT,
caryopses, natural lipase bioreactor, 761
OF FATTY ACIDS,
colorimetric determination, assay of, lipases in reverse micelles, 110
OIL,

pilot plant, *Vernonia galamensis*, seed, 512
protein, analysis of single soybean seeds, 686
OIL CHARACTERISTICS,
effect of puffing, *amaranth* (rajgeera) seeds, 952
OIL CONTENT OF SEEDS,
influence of fatty acid composition, determination of, NIR, 473
OILBEAN,
seeds, solvent extraction, 25
OILS,
determination of, total unsaturation, Fourier transform raman spectroscopy, 483
OILSEED LIPID BODIES,
isolation, physicochemical characterization, half-unit membranes of, 353
OLEFIN SULPHONATION,
sultones, formation of, 1020
OLIVE OIL,
virgin, 192
OLIVE OILS,
fatty alcohols, sterols, esters, LC-GC, 626
OPTIMIZATION,
column loadability, preparative HPLC, soybean phospholipids, 815
ORGANOSELENIUM-MEDIATED CYCLIZATION OF HYDROXYOLEFINIC FATTY ACIDS AND M-,
CPBA oxidation of selenium-containing, 1,4-epoxy acids, 932
OXIDATION OF LINOLEIC ACID IN AQUEOUS DISPERSION,
antioxidant effect, naturally occurring furan fatty acids, 858
OXIDATIVE STABILITY,
vegetable oils, effect of, randomization, 525
OXOFATTY ACIDS,
fats and oils, determination, occurrence, 635

P

PACKAGING MATERIALS,
effect of, storage stability, palm oil, 259
PALM OIL,
tocotrienols, electron spin resonance spectra, tocotrienoxyl radicals, 250
thermal, autoxidation, effects of, flavonoids, 255
effect of, packaging materials, storage stability, 259
PALM OIL FRUIT,
lipase, histological localization, 665
PALM OIL MELT,
kinetics, nucleation, 879
PALM STEARINE,
thermal analysis, DSC, 171
hydrogenation, chemical, composition, thermal properties, 176
PEA,
protein, extraction and functionality, 276
PEANUT CULTIVARS,
U.S. runner-type, fatty acid variation, 591
PEANUT PROTEIN,
product functionality, 293
PETROSELINIC ACID,
Umbelliflorae seed oils, 607
PHASEOLUS VULGARIS L.,
protein concentrates, production, functional characteristics, 285
PHOSPHATE TYPE,
surfactants, syntheses, 394
PHOSPHATIDYLCHOLINE,
synthesis, with (n-3) fatty acids, by phospholipase A 2 in microemulsion, 766
PHOSPHOLIPASE D ACTIVITY,
soybeans, soy flakes, effect of moisture, microwave heating, and live steam treatment, 867
PHOSPHOLIPIDS,
in crude oil, evaluation of, soybean deterioration, 757
PHYSICOCHEMICAL PROPERTIES,
2-(N-alkyl-N,N-dimethylammonio)ethyl hydrogen, phosphates, 149
PHYTOSTEROLS,
vegetable oils, HPLC, evaporative light-scattering detection, 827
PIGMENTS,
citrus, seed, oils, processed with or without, cottonseed oil, cucurbit, prune, 376
virgin, olive oil, 192
POLAR SOIL COMPONENTS,
effect, phase inversion, temperature, optimum detergency conditions, 722
POLYENOIC FATTY ACID METHYL ESTERS,
hydrogenation, selectivities and yields, 226
POLYMERS,
heated, olestra, olestra/triglyceride blend, isolation and characterization, 788
POLYMORPHISM,
natural, commerical solid fats, a review, 835
melting points, saturated, triacylglycerols, 415
POLY(OXYETHYLENE)HYDROGENATED CASTOR OIL,
aqueous vesicle dispersion, 55
POLYUNSATURATED,
glyceride syntheses, microbial lipases, 921
POTATO SLICES,
liberation of, free fatty acids, at low temperature, 784
PRASEODYMIUM,
linoleates, conductometric studies, thermodynamics of dissociation, and micellization, neodymium, 464
PREPARATION OF METHYL ESTERS,
transesterification, 18
PRODUCT FUNCTIONALITY,
peanut protein, 293
PRODUCTION POTENTIAL,
eicosapentaenoic, arachidonic acids, red alga, *porphyridium cruentum*, 916
PROPERTIES OF AQUEOUS SOLUTIONS,
two binary mixed systems between, bile salts and nonionic surfactants, 1002
PROPYLENE GLYCOL ESTERS,
GLC determination, a new, internal standard, 797
PROTEIN,
extraction and functionality, 276
oil, analysis of single soybean seeds, 686
PROTEIN CONCENTRATES,
phaseolus vulgaris L., production, functional characteristics, 285
PROTEINS AND OIL PATTERNS IN U.S. AND WORLD SOYBEAN MARKETS,
966
PRUNE,
seed, oils, pigments, 376
PUMPKIN,
seeds, solvent extraction, 25
PYROPHORISITY,
spent, bleaching clay, 678

Q

QUANTITATIVE PREPARATION,
long chain, oxo-*trans*-2-enoic, ester, 9,12-dioxo-*trans*-10-enoic acid, 937
QUATERNIZATION,
alkyl amines, effect of chain length, on the rate of, 469

R

RANDOMIZATION,
oxidative stability, vegetable oils, 525
RAPESEED,
proteins, functional, nutritional, properties, 531
determination, total glucosinolate, glucose release, 821
RAPESEED/MUSTARD OILS,
detection of, argemone oil, 338
RAPID ROUTINE,
determination, total glucosinolate, rapeseed, glucose release, 821

REDUCTION,
mechanism, hydrazine reduction reaction, 940
RHODIUM-CATALYZED,
deuteration, unsaturated triglycerides, 52
RHODOTORULA GRACILIS CRF-1,
lipids, composition, 642
RICE BRAN OIL,
utilization, antifoamer, 61
RICE HULL ASH,
adsorption of, soy oil free fatty acids, 15
competitive adsorption, lutein, 572
RICE HULL SILICA,
x-ray diffraction, studies, 576
ROOM-ODOR TESTS,
low-linolenic rapeseed oil, 161
RUBBER,
seed oils, extraction of, temperature effects, 443
seeds, solvent extraction, 25
RUBBER SEED OIL,
nutritional, toxicological, evaluation, 883

S

SAFFLOWER,
glycerol acylating enzymes, 217
SAL,
butters, triterpene alcohols, 388
SAMARIUM SOAPS,
micellar behavior of, influence of alkanols, 446
SATURATED,
triacylglycerols, crystal structures, melting points, 415
SCANNING ELECTRON MICROSCOPE,
studies, processed, rice hull silica, 576
SESAME,
oil, *sesamum indicum L.*, strains, 508
SESAMUM INDICUM L.,
strains, oil, minor components, 508
SHORT SPACINGS,
polymorphic forms, natural, commercial solid fats, a review, 835
SODIUM DODECYL SULFATE SOLUTIONS,
influence, detergent builders, surface properties, 698
SOLID PHASE EXTRACTION,
determination, neutral oil in, detergent products by, 142
SOLID PHASE,
enzymatic glycerolysis, beef tallow, 779
SOLVENT EXTRACTION,
oilbean, seeds, oils, melon, pumpkin, rubber, 25
fatty acids, natural oils, liquid water, at elevated temperatures and pressures, 852
SOLVENT WINTERIZATION,
fungal oil, from *Mortierella genus*, increase in, γ-linolenic acid, 846
SOXTEC SYSTEM,
soybeans, oil determination, 431
SOY FLAKES,
phospholipid D activity in, effect of moisture, microwave heating, and live steam treatment, 867
SOY OIL,
lecithin, competitive adsorption, rice hull ash, 572
SOY OIL FREE FATTY ACIDS,
adsorption of, rice hull ash, 15
SOY/PEANUT,
blends, yield, quality, tofu, 381
SOY PROTEIN FUNCTIONALITY,
status, food systems, 265
SOY PROTEINS,
thermal denaturation, dye-binding characteristics and functionality, 872
SOYBEAN OIL,
effect, of, extraction solvents, oxidative stability of, 165
of autoxidized, effects of filtration through bleaching media, thiobarbituric acid, carbonyl values, 373
crude, ultrasonic, degumming, 33
color quality, effect of soybean pretreatment, 368
from Ohio, analysis, 594
SOYBEAN OILS IN CANS
volatile compounds, effect of water content, 96
SOYBEAN PHOSPHOLIPIDS,
optimization, column loadability, preparative HPLC, 815
SOYBEAN SEED
effect, simulated freeze damage, composition, functionality, 308
SOYBEAN SEEDS,
and seedlings, subcellular localization of lipoxygenase-1 and -2 in germinating, 961
SOYBEANS,
export, quality, 743
estimating, processed value, 302
phospholipase D activity in, effect of moisture, microwave heating, and live steam treatment, 867
cracking and dehulling, damaged, shriveled, wrinkled, 750
oil determination, Soxtec system, 431
tofu, yield, quality, 381
STABILITY,
kathon CG/ICP microbicide, in α olefin sulfonate, based systems, 116
STEROLS,
olive oils, 626
STORAGE,
commercial, margarine, at, different temperatures, 989
STORAGE STABILITY,
effect of, packaging materials, palm oil, 259
STRUCTURAL PROPERTIES,
monoacid triglycerides, influence of *cis* and *trans* double bonds, 653
SUBCELLULAR LOCALIZATION OF LIPOXYGENASE-1 AND -2 IN GERMINATING,
soybean seeds, and seedlings, 961
SULFATED POLYOXYETHYLENATED GUERBET ALCOHOLS,
surfactants, properties, structure, 197
SULFONATION STUDIES,
monoisomeric di- and trialkylbenzenes, 132
SUNFLOWER OIL,
lipase catalyzed alcoholysis, 168
South African, metathesis of fatty esters, 362
SUNFLOWER SEED OIL,
fatty acid composition of, influence of location, climatic conditions, 618
SUPERCRITICAL FLUID CHROMATOGRAPHIC ANALYSIS,
ethoxylated alcohols, 123
SUPERCRITICAL FLUID EXTRACTION,
Mortierella ramanniana var. *angulispora*, fungal oil, using, nitrous oxide, carbon dioxide, trifluoromethane, 553
SURFACE ACTIVE PROPERTIES,
sulfonated, isoricinoleic acid, 205
SURFACE ACTIVITY,
quaternary ammonium salts, jojoba oil, 605
lipid products, hydrolyzed with lipase and phospholipase A-2, 1008
SURFACE ACTIVITIES,
biodegradablity and antimicrobial properties of, n-alkyl, glucosides, mannosides, galactosides, 996
SURFACTANT,
n-acyl amino acids, structure, correlation, 1015
anionic, surface active properties sulfonated, isoricinoleic acid, 205
SURFACTANT PROPERTY,
linear alkanes, with two pyrrolidone, moieties, 739
SURFACTANT SOLUTIONS,
oily substances, formation, liquid crystalline phase, 154
SURFACTANTS,
solubilization, mixed micelles, 340
gradient methods, science, status, 705
ethoxylated alcohol, wastewater, HPLC determination, 103
anionic, cationic, cloud point phenomena, 717
structure, sulfated polyoxyethylenated guerbet alcohols,

properties, 197
characterization, preparation, 733
samarium soaps, 446
alkylethoxyethanesulphonates, synthetic conversions, 730
molecular mass, distribution, 209
syntheses, phosphate type, amphoterics, 394
physicochemical properties, linear alkylbenzene sulfonates, 547
ethoxylation rate constants, effect of process variables, 541
neutralized oxidized, hydrocarbons, 406
SYNTHESES,
2-(N-alkyl-N,N-dimethylammonio)ethyl hydrogen, phosphates, physicochemical properties, 149
amphoteric surfactants, containing a phosphoric acid, 451
SYNTHESIS,
by immobilized *Mucor miehei* lipase, influence of water, 775
enzymatic, n-ε-acyllysines, 771
fatty monoglyceride sulfates, 8
phosphatidylcholine, with (n-3) fatty acids, by phospholipase A 2 in microemulsion, 766
n-acyl amino acids, correlation, structure, surfactant, properties, of their sodium salt, 1015

T

TERTIARY BUTYLHYDROQUINONE,
efficacy, storage, heat, stability, liquid, canola shortening, 585
THERMAL,
monoacid triglycerides, influence of *cis* and *trans* double bonds, 653
THERMAL ANALYSIS,
palm stearine, DSC, 171
THERMAL DECOMPOSITION,
indole, glucosinolates, processing, canola seed, 73
THERMAL DENATURATION,
soy proteins, dye-binding characteristics and functionality, 872
THERMAL FRACTIONATION,
butter oil, critical evaluation, 981
THERMAL PROPERTIES,
palm stearine, hydrogenation, 176
THEVETIA PERUVIANA (PERS.) K. SCHUM.,
seed oil, variations in, 624
THIOBARBITURIC ACID,
effect of filtration through bleaching media, of autoxidized, soybean oil, 373
THIOETHERS,
quantitative preparation, oxo-*trans*-2-enoic, ester, 9,12-dioxo-*trans*-10-enoic acid, 937
TOCOPHEROLS,
vegetable oils, HPLC, evaporative light-scattering detection, 827
TOCOTRIENOLS,
palm oil, electron spin resonance spectra, tocotrienoxyl radicals, 250
TOCOTRIENOXYL RADICALS,
electron spin resonance spectra, tocotrienols, palm oil, 250
TOFU,
soy/peanut, blends, soybeans, 381
TOTAL GLUCOSINOLATE,
rapeseed, glucose release, rapid routine, 821
TRACE ANALYSIS,
alkylphenol ethoxylates, HPLC, 400
TRANSESTERIFICATION,
method, preparation of methyl esters, 18
TRIACYLGLYCEROLS,
structure of, meadowfoam oil, 503
TRILAURIN,
small angle, neutron scattering, 76
TRITERPENE ALCOHOLS,
illipe, butters, sal, 388
TURNIP RAPE,
glycerol acylating enzymes, 217

U

UMBELLIFLORAE SEED OILS,
petroselinic acid, by combined GC and ^{13}C NMR, 607

V

VEGETABLE OIL VOLATILES,
analysis of, multiple headspace, extraction, 800
VEGETABLE OILS
interesterification, cocoa butter-like fat, 832
oxidative stability, effect of, randomization, 525
quantitative, high resolution, ^{13}C nuclear magnetic resonance, 487
VERNONIA GALAMENSIS,
rich source, epoxy acid, 844
seed, oil, pilot plant, extraction of, 512
VERNONIA GALAMENSIS MEAL,
chemical evaluation, defatted, 92
VIGNA UNGUICULATA,
flour, functional characteristics, 272
VOLATILE COMPOUNDS,
soybean oils in cans, effect of water content, 96

W

WASTEWATER,
HPLC determination, ethoxylated alcohol, surfactants, 103

X

X-RAY DIFFRACTION,
studies, processed, rice hull silica, 576
